Note								

This is a General Diet plan Sample Which shows we should eat like this. We should consume all these food itmes on daily basis in order to stay healthy

After following any diet plan if you are feeling weakness that means you are eating less according to your body. In that case you can add up 1-2 spoon of desi ghee, around 50g of paneer or 3-4 eggs

In case you are feeling lazy or full after having your meal this means you are having more than your body needs. In that case eat only 70-80 of your meal.

Most imp. Before follow any diet plan it is advisable to consult your phyician for the same.
